

Build the Future of Travel

Exclusively for HBCU Undergraduate Students

College Credit Available

Remote

10-15 Hours/Week

SkySpot is building the predictive arrival intelligence layer for air travel. Instead of telling travelers to arrive hours early, we help them know exactly when to leave using AI, traffic, airport conditions, and traveler preferences.

Why Join SkySpot

Early Startup Experience

Work directly with the Founder and help shape a growing product.

Real Product Marketing

Launch real campaigns seen by thousands of travelers.

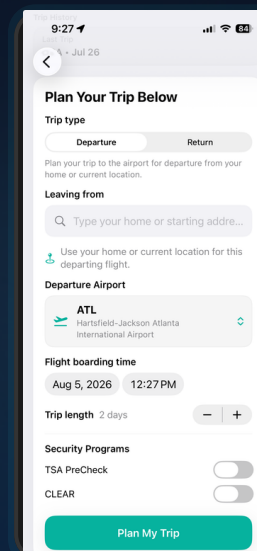

Portfolio Projects

Create work you can showcase after graduation.

Travel Tech

Help build the future of airport travel.
